# Consumer & Living

**Have fun with your iPad®. iBezel gives instant access to 8 of your favorite home control functions - if your iPad® is in use or not.**

As an accessory to any complete home control system, iBezel represents the most universal and intelligent touch panel for the next generation. This combination enables the iBezel to work with major\* control systems, offering professional wireless touch functionality through the iPad®, paired with immediate access to hardwired keypad controls.

A photograph of four business professionals in a modern office setting. They are silhouetted against a large window that looks out onto a sunset. One person is standing and shaking hands with another who is seated. Two other people are seated at a table in the foreground. The overall mood is professional and collaborative.

## Business & Professionals

A close-up image of the iBezel device, a black rectangular control panel. It features a small screen at the top, a central touch-sensitive area, and a keypad at the bottom with several illuminated icons for various functions like Wi-Fi, Bluetooth, and power.

**Compatible. Fully customizable. iBezel is the most powerful business partner.**

The open source interface makes it compatible with all major control systems and all other devices in your project. Every function your customers know and love can be completely controlled using iBezel. Through the programmable and customizable quick access keypad you get your favorite applications at your fingertips.

Functions

iBezel

**With iBezel every single home / hotel room / apartment can be managed centrally.**

Up to 8 favorite functions of the compatible installed devices are simply paired and configured to the iBezel. Options are limitless from lighting shading solutions, thermostats, door systems, AV and HVAC. Seamless compatibility with a variety of major brands enables the iBezel to trigger environmental scenes with a fingertip. Devices can be controlled individually or combined as scenes to control a room or the entire home.

## Consultant & Architect

**The iBezel can operate many devices in your home automation system quickly and easily through a simple button press.**

It is intuitive to operate and eliminates the need for switches, wires and individual remote controls. This innovation combines intelligent technique with a unique design, high quality materials and a seamless integration in every wall type. Everything can be combined to a central control point that's simple to use and affordable.
